

OUR PROUD TRACK RECORD

GAAP has been established over 25 years and forms part of the JSE-listed UCS Group.

GAAP provides POS systems designed for all hospitality applications - from small stand-alone operations to multi-store franchise groups.

Local development - 100% South African in-house design - complete management solution for your restaurant, take-away, bar or nightclub.

System and Hardware maintenance and support are key components of our service offering. We are available to the industry as it operates - 24-7-365.

GAAP systems are available on an outright purchase option, or as rent-to-own with a low initial deposit.

“RELIABLE SERVICE DRIVEN FOCUSED“

Easy-to-use software packages with all the functionality you need.

POS module offering a graphical interface that is easy to learn. Simple end-of-day process including cashups and backups.

Recent innovations that can revolutionize service levels and productivity are our mobile POS system, as well as the bump screen or kitchen display that can also increase security.

Complete back-of-house software includes all stock control mechanisms required - supplier comparison - goods receiving - recipe explosions - stock takes and variances - manufacturing - weekly food cost.

Classroom training sessions at our major offices and on-site training are included in all contracts to ensure maximum benefit of the system without additional costs to you. We have industry-experienced consultants available to you.

Our software ensures maximum control and profitability within your business with instant access to all information.

“PRACTICAL FUNCTIONAL ADAPTABLE“

OUR LEGENDARY PRODUCT

We are official IBM and Epson Business Partners. IBM Surepos touchscreen terminals are retail hardened and designed for the industry.

Unique XP Embedded operating system, for dedicated point-of-sale terminals, has been designed in-house, in conjunction with Microsoft, to assure users of speed and stability. Back office terminals use standard XP Professional.

GAAP offers seamless integration to Pastel, on-line loyalty programmes and various property management systems including our preferred partner - The HOST.

Customer Web Interface - utilizes GPRS/EDGE communication on our own MTN Private Network - eliminates the need for telephone lines and internet contracts. This is a completely automated and cost-effective solution to franchises and multi-store owners.

The data flow between stores and our data warehousing is proactively monitored, on a daily basis from our offices - we can respond to interruptions before you even notice them!

Online reporting gives access to all store / regional / national information on sales, purchasing and operations. Menus and prices can be adjusted on the web and sent down to store level for activation at a pre-determined time.
